Savin LS3000 Large Capacity System

> **maximum productivity**

> **extreme reliability**

> **outstanding flexibility**

Increase productivity. SAVIN® Digital Duplicators offer Corporate Reproduction Departments and Print-for-Pay companies an economical way to handle most printing jobs. Now you'll have the added benefit of running those jobs faster and easier. The Savin LS3000 is a large capacity paper system with an input tray of 3000 sheets and a matching output tray unit. This large capacity system reduces time spent loading and unloading paper and significantly decreases down-time between printing jobs.

Cost-effective solution. In the competitive printing market, the LS3000 gives you the advantage of loading a large quantity of paper at one time. Now you can run large print jobs on your Savin Digital Duplicator without interruption.

Wide array of paper stocks. The LS3000 gives you the added flexibility of printing on a wide variety of paper stocks. Paper types, weights and sizes up to 11" x 17" and envelopes up to 10" x 13" are handled effortlessly by the LS3000. It even handles specialty type papers and NCR forms without a problem. Side guides located at the top of each tray are easily adjusted to fit the paper size you need.

Added quality. The technology built into the LS3000 dramatically eliminates set-off problems during printing. Proper paper alignment is ensured because the Large Capacity Output Tray lowers automatically to maintain a uniform height, allowing the printed sheets to stack properly. Printed sheets are easily removed from the Output Tray by releasing the side guides and end plate. And, placing paper in the Input Tray is effortless—simply place the sheets directly in the tray and you're ready to print.

Handle those rush jobs. Rush jobs are a constant problem for Corporate Reproduction Departments, Print-for-Pay businesses and large volume users. To run another job when using the LS3000, simply detach the Large Capacity Input Tray unit by releasing the lever. Place the stock for the new job directly through the connected Savin Digital Duplicator and proceed with the printing. When finished, reconnect the Large Capacity Input Tray and proceed where you left off. It's easy, quick and efficient.

For more information about the Savin LS3000, contact your authorized Savin sales location.

SPECIFICATIONS

Mainframe	Large Capacity System LS3000
Configuration	Consists of two units: Large Capacity Input Tray (LCIT) and Large Capacity Output Tray (LCOT). The LCIT can be used independently.
Input Tray Paper Capacity	3,000 sheets (20 lb.)
Output Tray Paper Capacity	3,000 sheets (20 lb.)
Minimum Paper Sizes	5.1" x 7.1"
Maximum Paper Sizes	11.6" x 17.0"
Paper Weights	12.5 lb. to 55.6 lb. Bond
Image Position Adjustment	Can be adjusted +/- 15mm vertically and +/- 10mm horizontally. (corresponds to Savin Digital Duplicator)
Applicable Paper Stocks	Handles stocks compatible with the connected Savin Digital Duplicator
Paper Feed Speed	60 – 120 sheets/minute (corresponds to the printing speed of the connected Savin Digital Duplicator)
